

Starting students survey

STELA – <universityName>

Dear student,

A few months ago the STELA-project has started at <universityName>. This project aims at using learning analytics to provide feedback to students regarding their academic engagement, activities, and performance.

Given the importance of first year students' experience, we will primarily focus on this pivotal moment in your educational career. In a first explorative stage, our aim is to explore the experiences and expectations when entering higher education.

For the project we have constructed this survey where you can have your say regarding your experiences in the transition to higher education and your expectations regarding the first year. Therefore, we ask you for your collaboration.

Filling in the survey will take approximately 10 minutes of your time. The study is carried out completely anonymously and the information is handled confidentially.

Thank you very much for your cooperation,

The STELA-team
